Select language and press [Save]

### 3.0 DEVICE CURRENCY SETTINGS

With this application it is possible to adjust your Safescan 6100 device to your needs. Selecting and loading other currencies, activating or deactivating denominations or loading user-modified denomination weights on the device.

#### 3.1 LOADING CURRENCIES ON YOUR SAFESCAN DEVICE

The device contains 3 currency positions. In the Settings menu you are able to easily upload every available currency of the world!

Connect the Safescan device to your PC with the enclosed USB cable and Power ON the device. (Make sure the device is connected with the adapter or 9v battery)

**Safescan 6100:** The screen displays LOAD.

**Safescan 6150/6155:** Press and release  then press and release **+** on the device. The screen will display |USB-PC|

Press  to open the *Settings menu* and go to *Device currency* settings field.

The screenshot shows the 'Device currency settings' window. On the left, there are three currency selection dropdowns labeled 'EUR', 'GBP', and 'USD'. Below them is a 'Program currency' button. To the right of these is a large empty rectangular box. Below the currency dropdowns is a 'Settings' button. At the bottom, there is a table with the following columns: 'Den', 'Status', 'Value', 'Weight (g)', 'Custom name', and 'Amount'. The table is currently empty.

Select a currency for every position from the 3 pull down menu's. When finished selection press **[Program currency]** to upload the currencies to the Safescan device. Check the message box if the currencies were programmed correctly.

**Safescan 6100:** After loading new currencies on the device the screen will remain displaying LOAD. Disconnect USB cable. The device will Power Off. When restarting the device the new currencies will be loaded

**Safescan 6150/6155:** After loading new currencies the device will automatically disconnect and return to counting mode.

### 3.2 LOADING CURRENCIES ON THE SAFESCAN DEVICE AS DEFAULT SETTINGS.

(not available for Safescan 6100)

To load currencies as default currencies on the Money counter select the box: 'Make default'. If the Money counter will be set back to default settings the programmed currencies will appear.

☒ View currencies with official weights only

**WARNING: Changing currency statistics can influence counting results**

View currencies with official weights only

Deactivating this box will show all available currencies. This means official and unofficial weights. Unofficial weights are currencies for which no official weights are currently entered in the software.

Some currencies have multiple versions of the same denomination. (old and new versions)

If there are more than one existing versions of a denomination the version numbers are shown in the currency settings menu. The oldest denomination will be named version 1.

A new issued denomination will be named version 2, and so on.
